

Tips to Prevent Water Pipes from Freezing

Cold weather comes the possibility of water pipes freezing. Here are a few tips that may help:

- * Keep the temperature in your home at a min of 55°**
- * Allow cold water to drip from faucet throughout the night**
- * Open cabinet doors to help circulate warm air to plumbing**
- * Seal any cracks and holes properly**
- * If possible, Insulate pipes that are in cold drafty places.**
- * Know where the main shut off valves are if you have one in your home.**
